

# projecting on windows

## TEMPLATES & ART

Express comes with 100's of customizable templates plus royalty free images. We include education specific templates with cutting edge graphics. Since the tools are internet based count on more graphics and new tools every month.

## WEB SOFTWARE

Express software is internet based, no installing and access from any internet computer. The tool is three integrated applications: layout, slideshow and management programs.

## MEDIA PLAYER

Our robust media player combined with our powerful operating system, (aM.OS) means you will be secure and confident your information is up and running.

Projection onto windows will convert the front of your business into a billboard, communicating active messages to pedestrians and motorists. .advancedMethod's digital signage solution is the easiest to install, easiest to use and easiest to manage. Project information network that keeps all your potential clients informed. Auto dealers, bakeries, retail clothing, photographers, electronics, the list is endless.

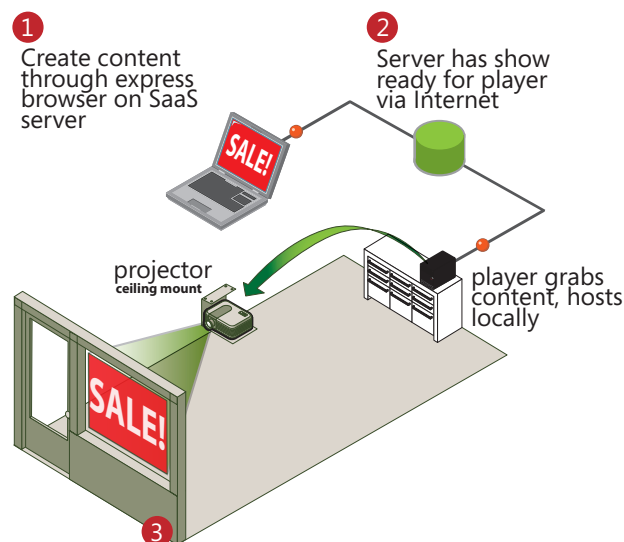

Most applications need:

1. express digital signage player
2. ceiling mount for a projector
3. projector with 3,000 lumens+
4. rear projection film or screen

For more information talk to the experts at .advancedMethod.

## Setting up rear projection window signage

Messages are projected onto film directly on the window or rear-projection screen set in front of the window. Films are designed to be seen in full daylight.
